ABSTRACT

There remains a high unmet need for novel treatments for CNS diseases. Many academic and industry scientists are eager to undertake novel drug discovery approaches for the treatment of neurological disorders but lack some of the drug discovery infrastructure. To boost and de-risk drug discovery and development in the neuroscience field, NIH Blueprint for Neuroscience Research introduced a series of translational programs to promote neuroscience drug discovery and development efforts to mitigate the current pipeline gaps.

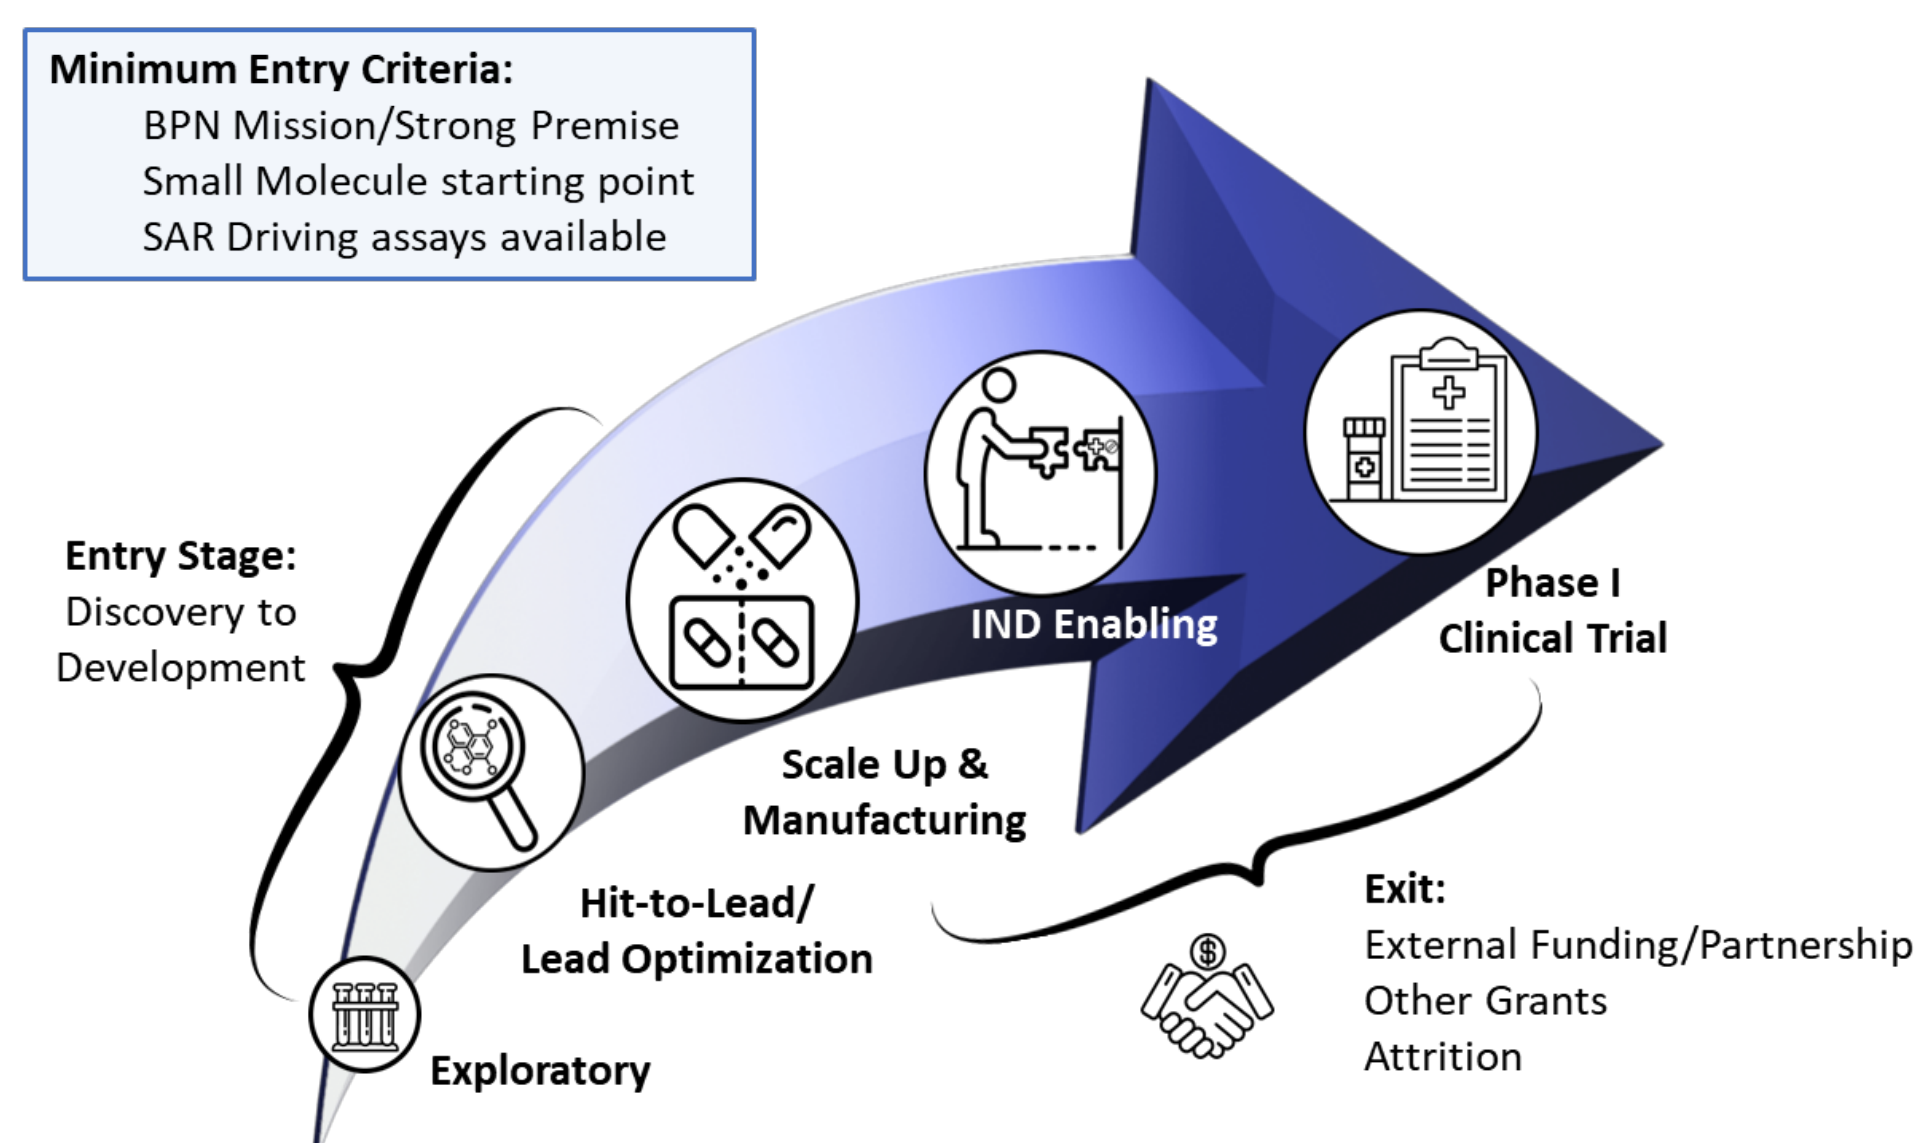

In this presentation, we demonstrate how NIH Blueprint Neurotherapeutics Network (BPN), by providing funding, resources (contract access to medicinal chemistry, DMPK, toxicology, drug manufacturing and formulation, as well as contract access to perform the Phase I clinical study) and expertise, have contributed to the successful translation of academic and industry discoveries in basic disease biology into novel drug candidates in clinical testing.

BLUEPRINT NEUROTHERAPEUTICS (BPN) PROGRAM VISION

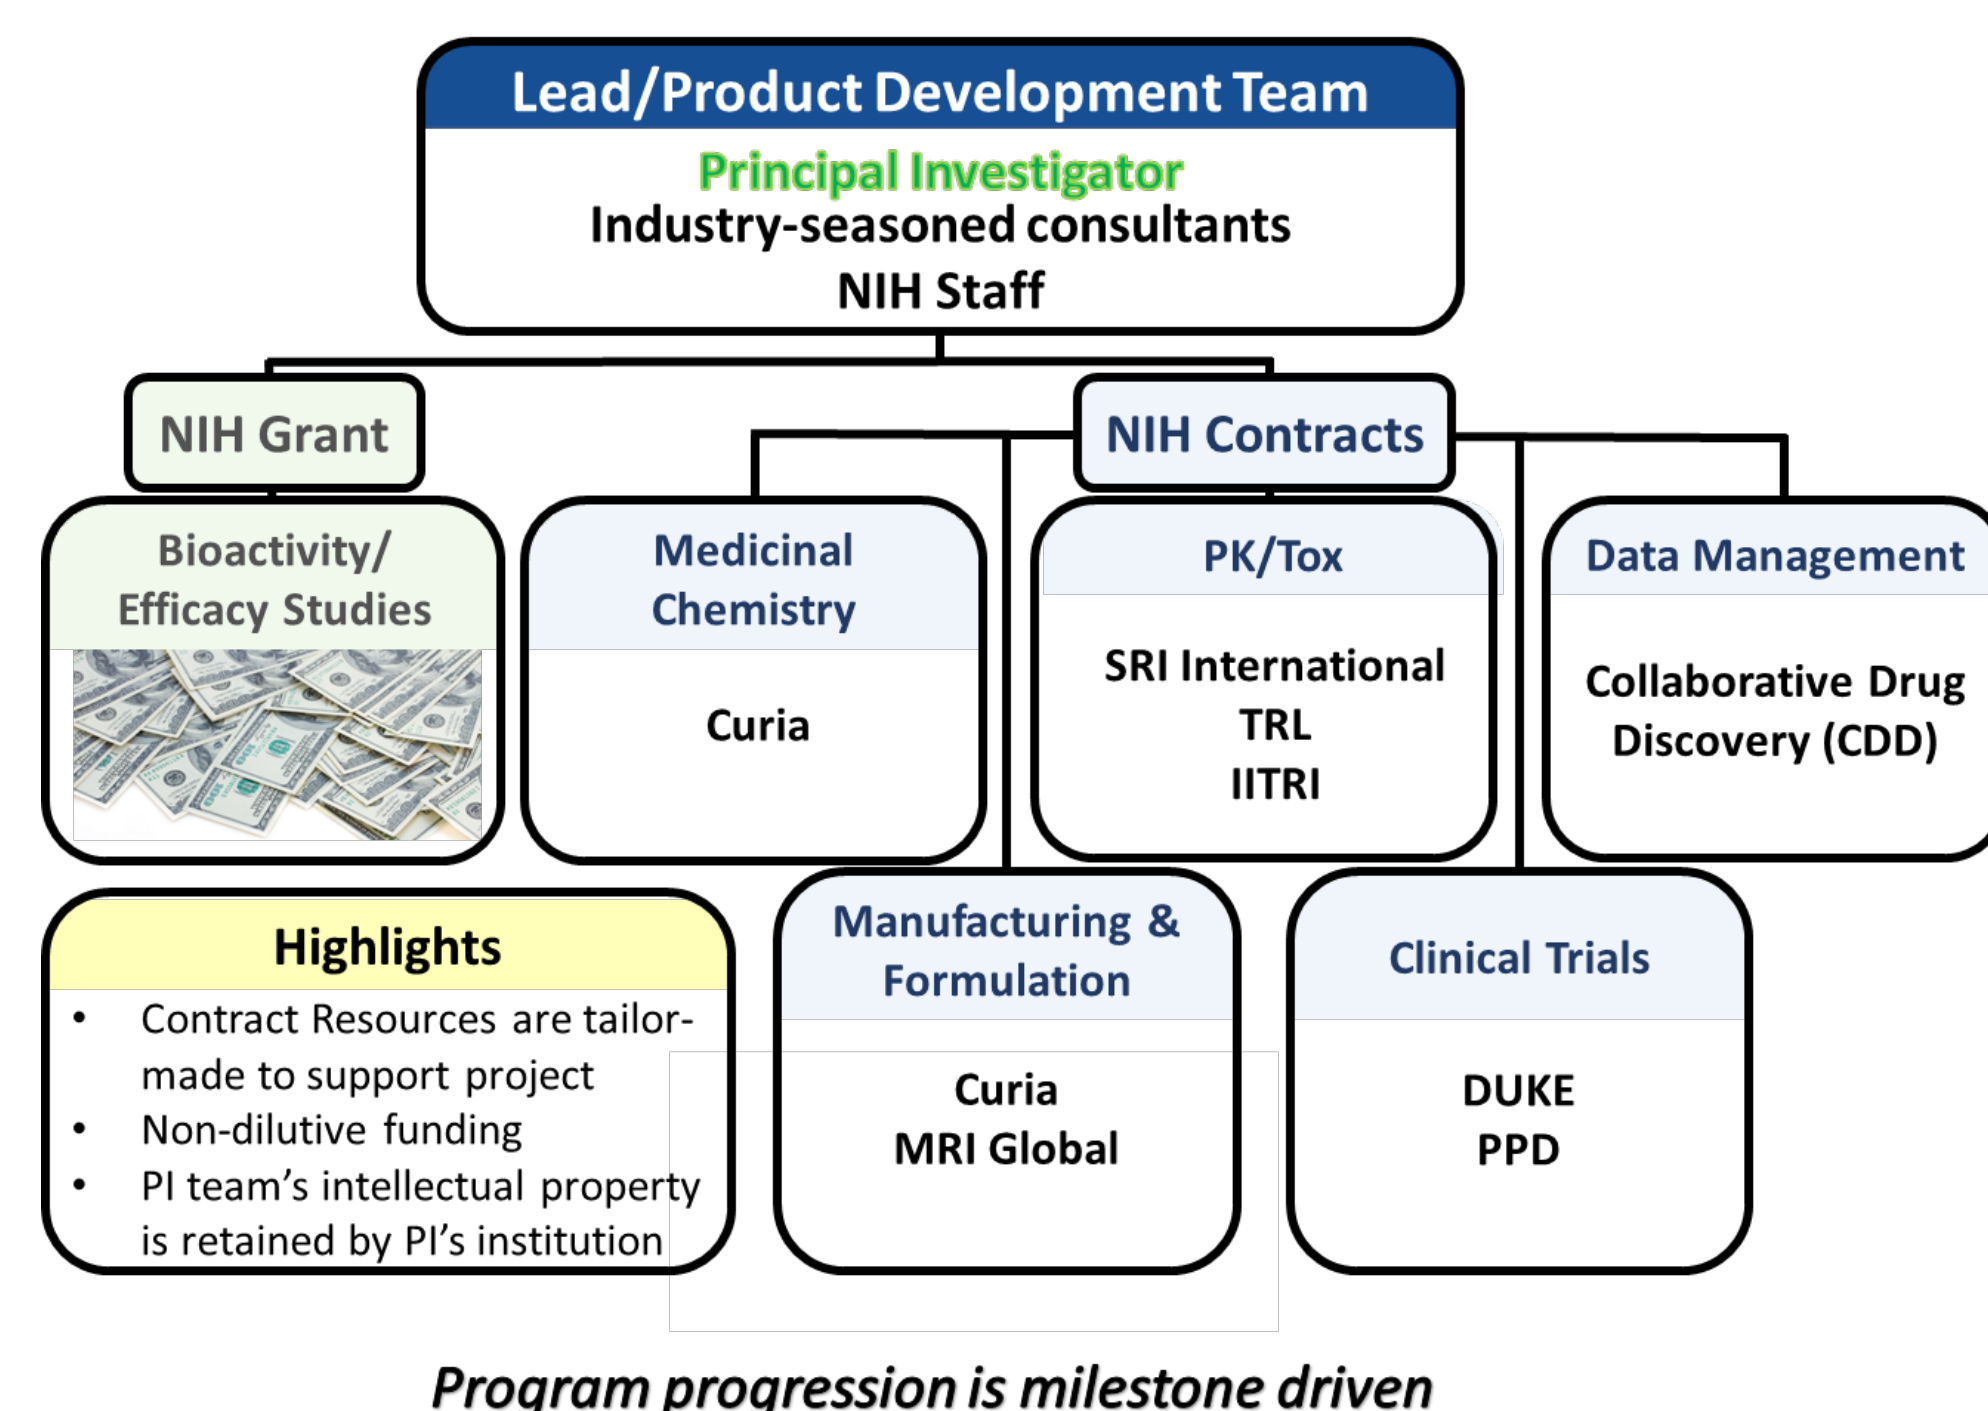

“Combine Strengths of NIH and Industry Expertise for Small Molecule Neuroscience Drug Discovery & Development”

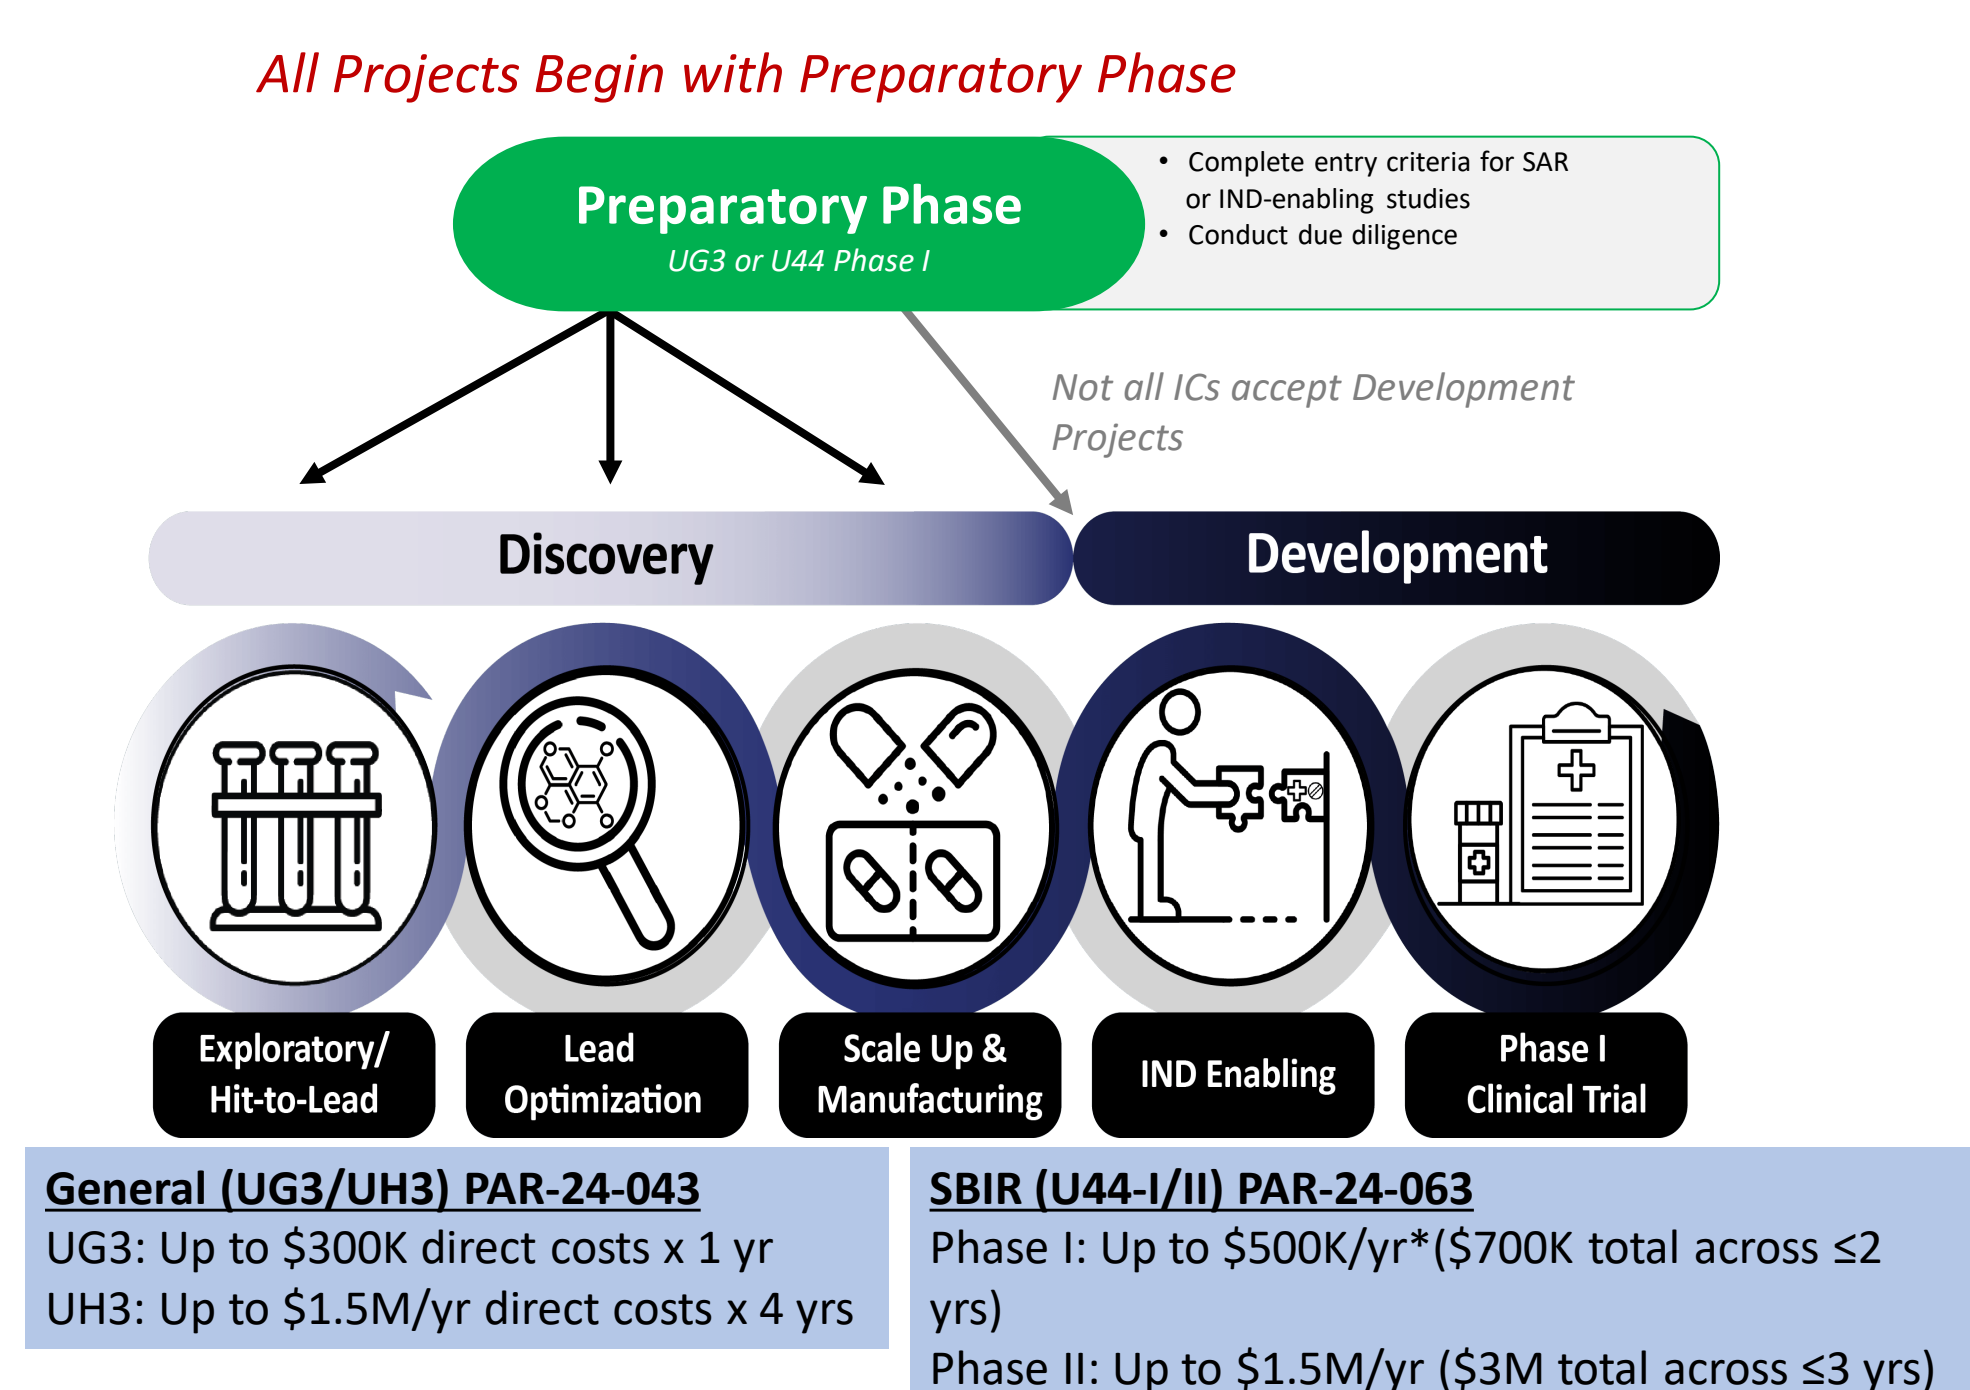

BPN PROGRAM- SCOPE

BPN PROJECT ORGANIZATION

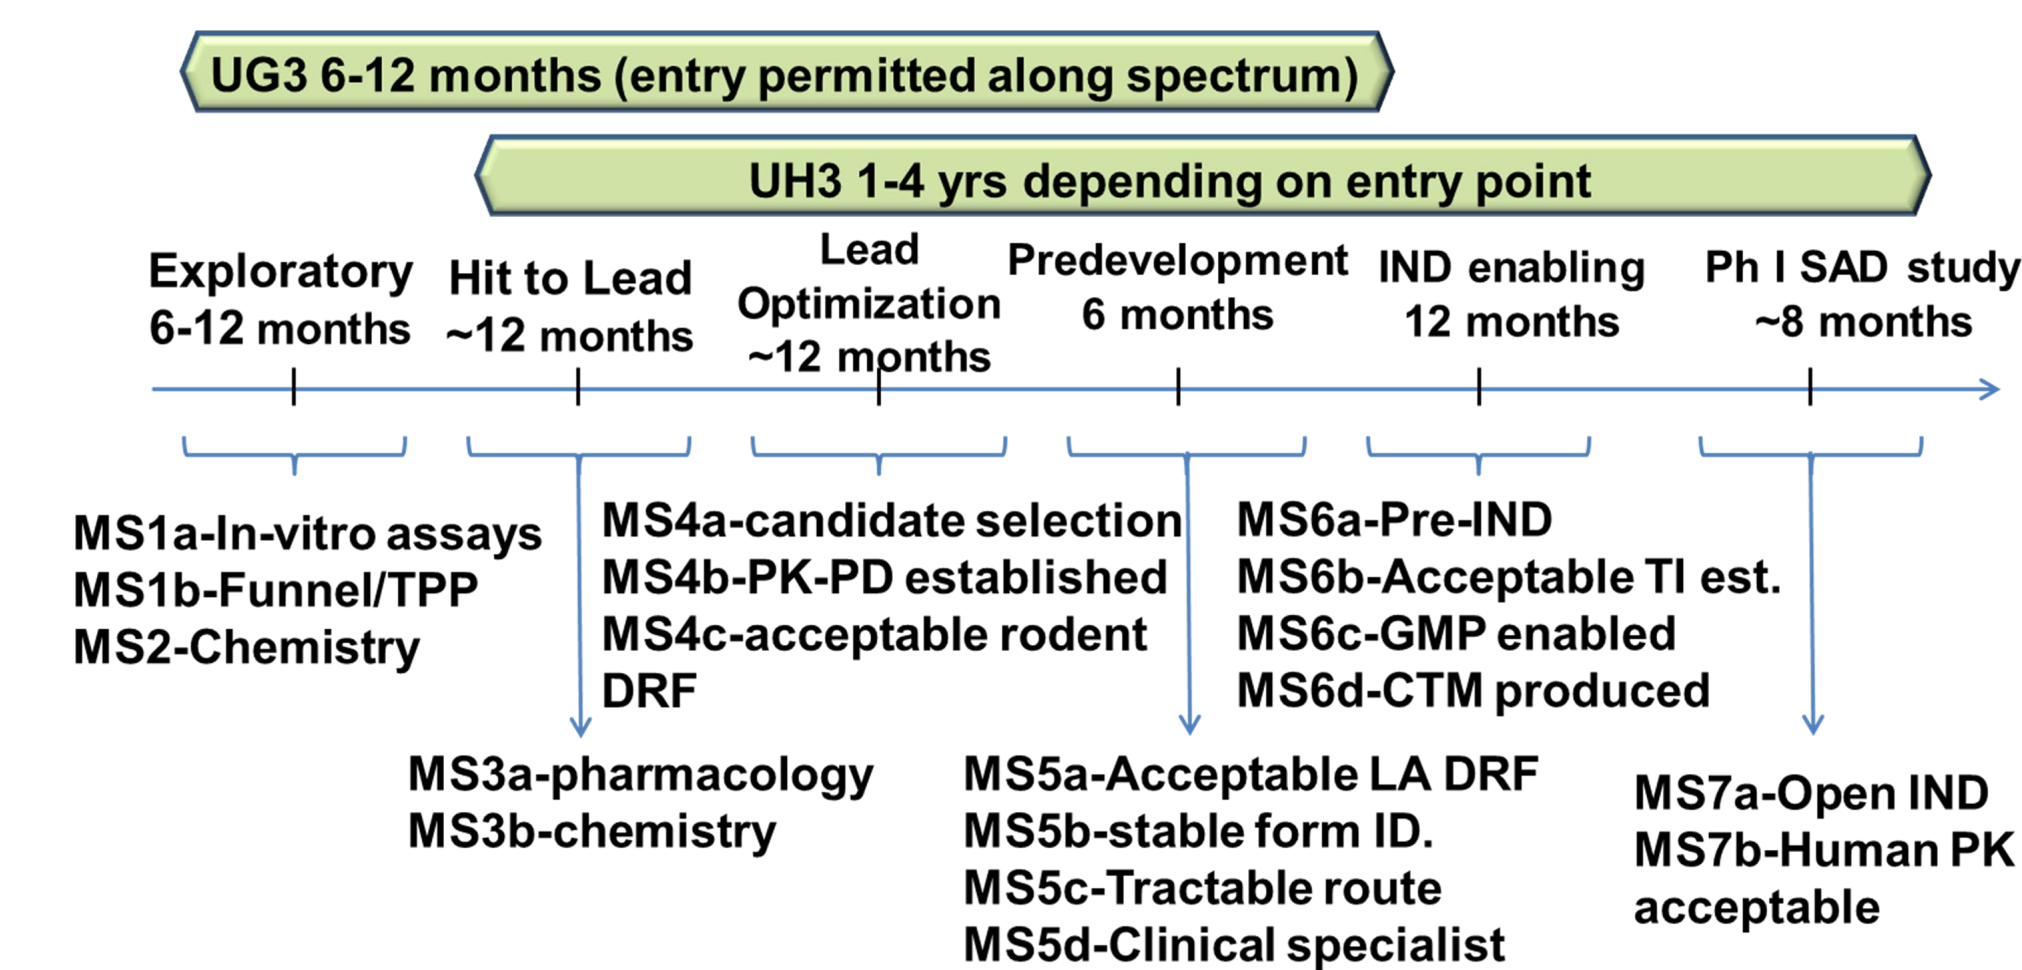

BPN – PROJECT CAN ENTER AT ANY PRE-CLINICAL STAGE

Next application due dates for BPN: February 9, 2024 & July 15, 2024

MILESTONE PROGRESSION BY STAGE

ENTRY CRITERIA

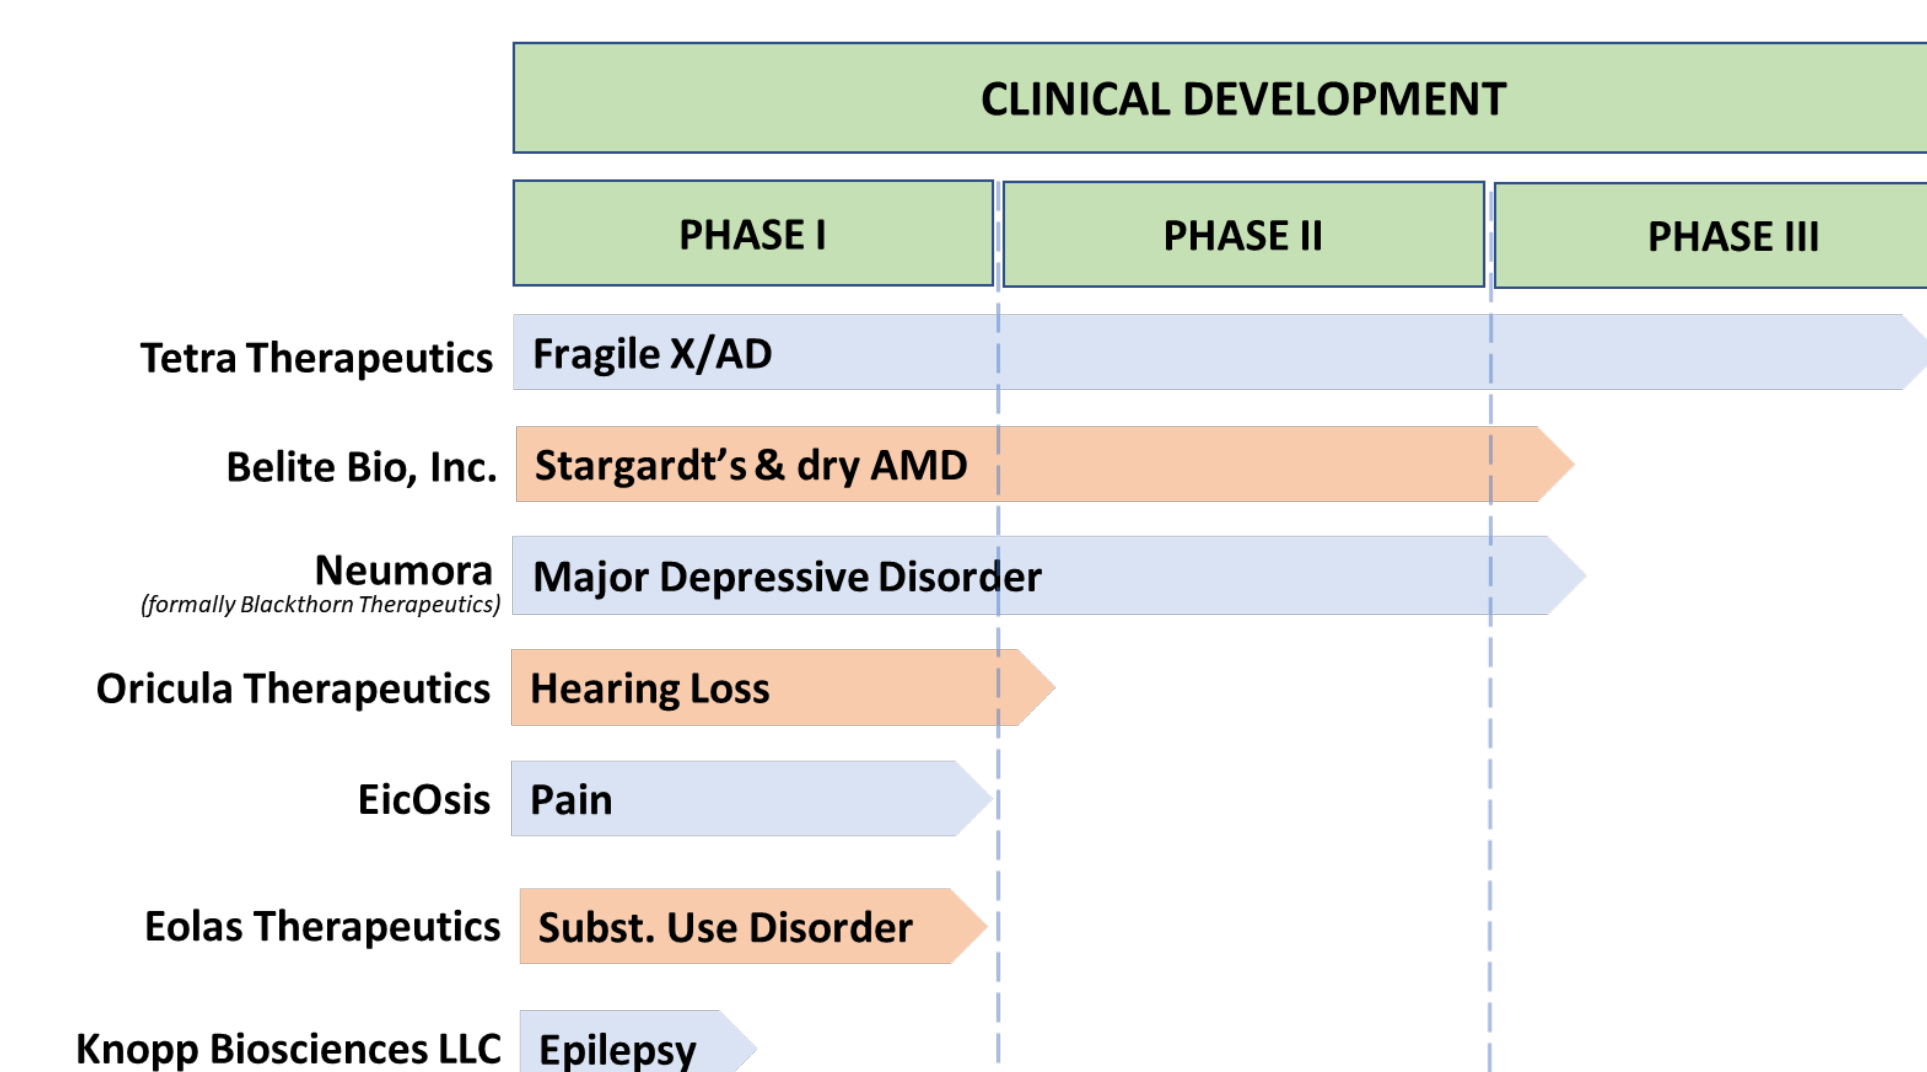

Discovery

- Disease Biology**
 - Novel target for the disease
 - Strong biological validation
 - Feasible path to the clinic
- Assays**
 - Robust in-vitro assay for optimization
 - Strong confirmatory assays
- Compounds**
 - Project must require medicinal chemistry
 - Amenable to chemistry
 - IP free of obvious roadblocks

Development

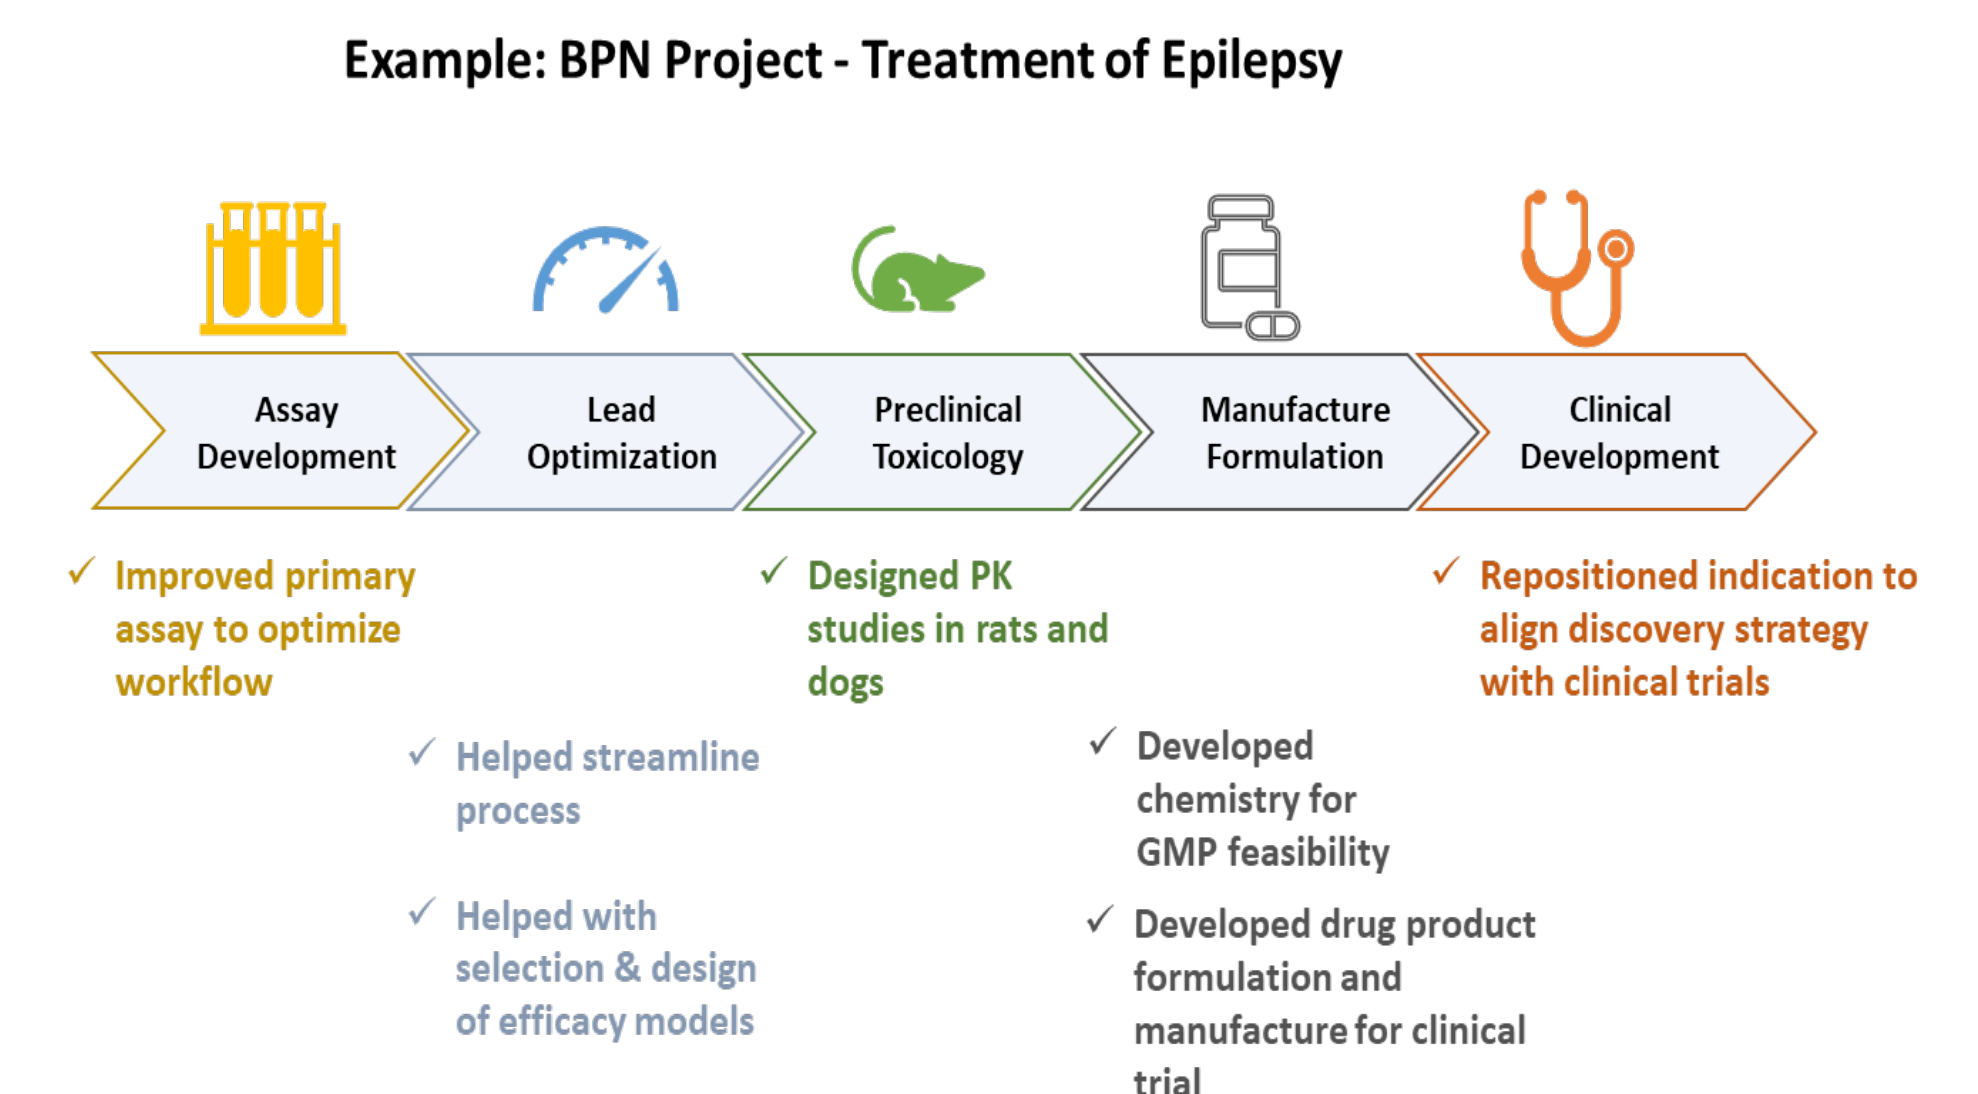

- Fully Optimized Compound**
 - Strong data linking target to disease
 - Biological & ADMET activity appropriate for intended clinical use
 - Efficacy/PD when delivered by clinically intended route
 - Fully profiled, defensible ADMET results
 - Feasible path to the clinic
 - IP free of obvious roadblocks

BPN PROJECTS SUCCESSFUL POST-PROGRAM PROGRESSION

10 projects have announced additional industry funding since utilizing the BPN

KNOW HOW AND EXPERTISE PROVIDED

A CROSS-NIH INSTITUTES EFFORT

NIH National Institute of Neurological Disorders and Stroke	Charles Cywin, PhD charles.cywin@nih.gov
NIH National Institute on Aging	Lorenzo Refolo, PhD refolo@mail.nih.gov
NIH National Institute on Alcohol Abuse and Alcoholism	Qi-Ying Liu, MD, MSc liuqi@mail.nih.gov
NIH National Center for Complementary and Integrative Health	Yisong Wang, PhD yisong.wang@nih.gov Patrick C. Still, PhD patrick.still@nih.gov Emrin Horgusluoglu, Ph.D. emrin.horgusluoglu-moloch@nih.gov
NIH National Institute on Drug Abuse	Elena Koustova, PhD, MBA koustove@mail.nih.gov Tanya (Tatiana) Ramey, MD PhD tanya.ramey@nih.gov
